

Please reject the National Association of Broadcaster's (NAB's) petition 04-160. I am currently an XM Radio subscriber and I pay a monthly subscription fee for commercial free radio broadcasts. I am very pleased that XM is beginning to offer an increased selection of both nationwide and local broadcast content. This is simply a competitive marketplace and the NAB's petition 04-160 will reduce competition in a free market. That is exactly the wrong effect for the FCC to encourage!

Thank you.
